

GlobalSign SSL Certificates

GlobalSign offers a simplified range of SSL Certificates – fitting neatly into the three newly defined SSL classes of Domain Validation (DomainSSL) issued in 5 minutes or less, Organization Validation (OrganizationSSL) and Extended Validation (EV SSL - ExtendedSSL) activating the green address bars in next generation browsers.

All GlobalSign SSL Certificates include premium features such as strong security at no additional cost – a feature other high value SSL Providers charge at additional rates. Further key features, such as 3 Server Licenses for the price of 1 and lifetime replacement policy, ensure that GlobalSign SSL customers receive the best value, most feature packed SSL available today.

About GlobalSign

Established in 1996 and as a WebTrust accredited public certificate authority, GlobalSign offers publicly trusted SSL, including new Extended Validation SSL Certificates, S/MIME and Code Signing Certificates for use on all Windows platforms including Mobile. The GlobalSign Trusted Root program allows the widely distributed and highly trusted GlobalSign root CA certificates to provide immediate trust for Microsoft CA and other in-house CA users, thereby eliminating the costs associated with supporting non-trusted root CA certificates within an enterprise. The company has a rich history of innovation within the online security market and operates sales and support offices in the US, UK, Belgium, Japan, and China with services available in a number of European and Asian languages.
